

QUALITY POLICY

Apex Electronics Ltd has a fully documented Quality Management System, which meets the requirements of ISO 9001: 2015.

The Quality Management System ensures that the company meets or exceeds its customer's requirements, satisfies Statutory and Regulatory requirements and its commitment to continual improvement.

The Quality Assurance Manual and procedures ensure risks and opportunities are identified and analysed to support the purpose and context of the organisation ensuring the reliability of service is achieved and maintained.

The Managing Director ensures that all personnel are responsible for the effective and economical running of the Quality Management System and ensures this Quality Policy is established, communicated, understood, implemented and maintained at appropriate levels within the organisation.

The company's commitment goals are: total customer satisfaction and continuous improvement through defined quality objectives and operating the Quality Management System in the most economic and effective way.

The Quality Policy is reviewed for continuing suitability ensuring it is appropriate to the company's operational activities and strategic direction.

This Quality Policy is available to interested parties upon written request.

The Quality Management System applies to:

The stockholding and supply of electrical and electronic components

(scope of registration excludes design activities)
